

Secure connection failed

If you're experiencing a problem during the online ordering we are trying to get it sorted.

We are assured from our web-masters there are no threats or virus problems on our shop software and the fault is leaning toward Avast virus software?.

Apparently it occurs mostly when using Firefox browser and avast virus software, the problem doesn't usually appear if using Internet Explorer or Chrome browsers along with Avast on same pc??.

If you don't have alternative browser then disabling the avast virus software for short period whilst making order overcomes the problem, we are in contact with Avast to overcome the problem..

If the above fails then you can place your order via phone 01270 766685

ABL Stevens.
